

## My Barometer Rules Short Guide

**with rules for thunderstorms, Strong Winds and Gales from the Secret Law of Storms**

### Last 3 hours

▲ 10 mb	Gale Warning (34 – 47 knots)
▲ 6 mb	Strong Wind Warning (26 – 33)
▲ 1.1-2.7	poorer weather to come ( > 1015 mb)
▼ 1.1-2.7	rain & wind ( < 1009 mb)
▼ 4 mb	storm ( < 1009 mb) rain & wind (1009 - 1023 mb))
▼ 6 mb	storm with a Strong Wind Warning ( <1009 mb)
▼ 7 mb	firestorm conditions if fire exists & (< 990 mb) & (> 40 °C) sustained
▼ 10 mb	storm with a Gale Warning ( <1009 mb)

### Severe Thunderstorm Warning

**Last 3 hours ▼ 4 mb Last 12 hours ▼ 8 mb (Pressure < 1005 mb)**

### Anytime in Storm Season (Tropics)

steady	Tropical Cyclone Early Warning if continuously steady for 6 hours
▼ 5 mb	tropical revolving storm (for fall below tropical seasonal average)

## More Barometer Rules

Last 3 hours ▼	< 1009 mb	1009 – 1018 mb	1019 – 1023 mb	> 1023 mb
rising	clearing and colder	no change, except poorer weather to come for 1.1 – 2.7 mb and > 1015 mb	no change except poorer weather to come for rise of 1.1 mb – 2.7 mb	fair weather except poorer weather to come for rise of 1.1 mb – 2.7 mb
steady	clearing and colder	no change	fair with slight temperature change	fair with no marked temperature change
1.1 – 2.7 mb	<b>rain &amp; wind</b>	no change	no change and rain within 24 hours	fair and slowly rising temperature
4 mb	<b>storm</b>	<b>rain &amp; wind</b>	<b>rain &amp;</b> may get increasing wind speed and temperature	warming trend
10 mb	<b>storm and Gale</b>
